 If searching among a large number of hyperparameters, you should rather than random values, so that you can carry out the search model. rely on chance. True or False? 	
True	
False	
Correct	
1/1 points	
 Every hyperparameter, if set poorly, can have a huge negative impa hyperparameters are about equally important to tune well. True or 	
True	
False	
Correct Yes. We've seen in lecture that some hyperparameters, such as t more critical than others.	he learning rate, are

3. Hyperparameterstuning, Batch Normalizations Programming strategy) 16/10 points $\label{prop:continuous} Frameworks \ \ \ \text{a lot of models in parallel ("Caviar") is largely determined by:}$ (100%)

Quiz, 10 questions

Whether you use batch or mini-batch optimization

1/6

	$deep-learning-specialization-courser a/quiz.pdf \ at \ master \cdot and ersy 005/deep-learning-specialization-courser a \cdot Git Hubberg 1 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 -$
	The presence of local minima (and saddle points) in your neural network
	The amount of computational power you can access
	Correct
	The number of hyperparameters you have to tune
	1/1 points
	4. If you think eta (hyperparameter for momentum) is between on 0.9 and 0.99, which of the following is the recommended way to sample a value for beta?
	1 r = np.random.rand() 2 beta = r*0.09 + 0.9
	1 r = np.random.rand() 2 beta = 1-10**(- r - 1)
	Correct
	1 r = np.random.rand() 2 beta = 1-10**(- r + 1)
	1 r = np.random.rand() 2 beta = r*0.9 + 0.09

Hyperparame Frameworks Quiz, 10 questions		10/10 points (100%)	
✓	1/1 points		
8. Which	of the following statements about γ and β in Batch Norm are true?		
	There is one global value of $\gamma\in\Re$ and one global value of $\beta\in\Re$ for each layer, and applies to all the hidden units in that layer.		
Un-s	selected is correct		
	They can be learned using Adam Gradient descent with momentum or PMSpreng		

	Correct	
	Correct	
	$\hfill \beta$ and γ are hyperparameters of the algorithm, which we tune via random sampling.	
	Un-selected is correct	
	$igcap$ The optimal values are $\gamma=\sqrt{\sigma^2+arepsilon}$, and $eta=\mu$.	
	Un-selected is correct	
	✓ 1/1 points

	0.22
	Deep learning programming frameworks require cloud-based machines to run.
	Un-selected is correct
	Even if a project is currently open source, good governance of the project helps ensure that the it remains open even in the long term, rather than become closed or modified to benefit only one company.
	Correct
	A programming framework allows you to code up deep learning algorithms with typically fewer lines of code than a lower-level language such as Python.
	Correct
